DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Robbins (USP 3,021,649). The patent to Robbins discloses a body comprising a sponge non-abrasive layer (10) overlying and attached to an abrasive layer (12). The preamble recites the term “renewable”, but the body of the claim fails to set forth any of the features of the “sponge” which pertain to the “renewing” thereof.

Allowable Subject Matter

3. Claims 2-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent to Politzer is also pertinent to a laminate sponge and the other patents are each pertinent to the concept of providing removable cleaning layers.
